

8" Sleeper depth takes into account  $7\frac{5}{8}$ " from the exterior framing towards the interior and  $1\frac{7}{16}$ " extending past the exterior framing. The  $1\frac{7}{16}$ " extension is needed to support the outer track. 8" sleeper width does not take into account: pans, membranes & sealant provided by others.

Project:	File name: 2750 3 Panel Multislide - 1.375 inch Nail-fin - .75 inch Sleeper Sill
Notes:	Layout: 3 Panel with .75 inch Sleeper Sill
